

Offshore Installation Manager (and Deputies)

Controlling emergencies

As an asset owner of an offshore installation it is essential that your Offshore Installation Managers and their deputies have the experience and confidence to manage a major emergency. This is integral to ensuring the safety of personnel, minimising harm to the environment and protecting your asset.

LINK Associates International has an OPITO accredited centre in Derby. With over 25 years experience in emergency response, we are able to provide training and assessment of OIM's and their deputies to OPITO standards.

At LINK Associates International, we offer bespoke training and assessment, utilising customised practical scenario based on your installation. Below are the list of installations covered:

- Production fixed
- Production floating
- Drilling operations fixed
- Drilling operations floating
- Mobiles
- Unmanned

Realistic simulation exercises are carried out in our state of the art training facility in Derby. Our team includes highly experienced individuals, the majority having been in the role of OIM and each having over 20 years experience in the Offshore Industry.

Training and Assessment Programme:

- Single OIM (OPITO)
Training and Assessment 2 days
- Two OIM (OPITO)
Training and Assessment 3 days
- Two OIM (OPITO)
Refresher Training and Assessment 3 days

Programme Content:

Defining emergencies, tools for assessing the situation and taking effective action, command and control strategies and processes, information management, communications in an emergency, decision making, delegation, stress management.

Programme Objectives:

Practice the OIM emergency role during realistic simulated emergencies, understand the roles of other team members, improve understanding of emergency response, improve communication skills, improve self confidence, improve command and control skills, provide opportunity to raise points openly, identify gaps in your procedures and associated arrangements.
