

LINK Associates International

Safety, Emergency & Crisis Management

Chemical Industries Association Approved chemsafe Level 2 Responder Training

LINK Associates International has been approved by the CIA to deliver chemsafe level 2 responder training to those industries and personnel likely to respond to a land-based transport distribution emergency involving chemicals and provide rapid expert advice.

The 2-day course will be held at LINK's acclaimed simulation training suite at Derby, where delegates will have the opportunity to undertake a range of activities and scenario-based exercises associated with attendance at a chemical incident, including interfacing with the emergency services, dealing with other response agencies, briefing response teams and engaging with the media. Utilising course leaders with a wide-range of response experience, the LINK course will allow delegates to understand and help prepare for the challenges and pressures of working at an incident scene.

Aims

To give delegates:

- A clear understanding of the **chemsafe** incident response mechanism, especially level 2
- An understanding of the incident scene key players
- An appreciation of the operational decisions they will be asked to make
- An awareness of the range of equipment needed to support a response team

Outcomes

Delegates will:

- know what their contribution is when dealing with chemical transport incidents
- understand how to develop and maintain an effective transport emergency response system

The following should attend:

- Emergency Response team leaders from industry, including distributors and transporters
- Distribution managers
- DGSAs
- Safety, Health and Environment managers
- Supply Chain managers
- Product Stewardship / Responsible Care managers
- Executives with responsibility for distribution, SH&E, Supply Chain, etc

Pre –course Qualifications and experience

No prior knowledge is required as the course will cover information sources and typical product escape situations, as well as relevant elements of vehicle design. Experience of working in task-centred teams would be helpful.

Cost

£990 + VAT – A 10% discount is applied to delegates whose employer is a member of the CIA

Responsible Care

CHEMICAL INDUSTRIES
ASSOCIATION

Course Content

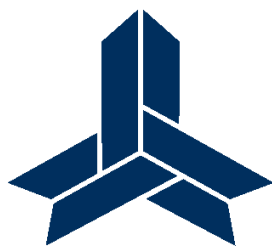

The course has been developed in conjunction with industry experts from within the CIA and its membership. Topics include:

- Scenario-based Exercises
- Product Distribution Overview
- Equipment
- Incident Management
- Consequences of an Incident
- Incident Reporting and Investigation

Who Should Attend?

This course will be of interest to delegates from the Chemical Manufacturing, Chemical Distribution and Transport industries, and other industry associations with responsibilities for attending the scene of an incident.
