

A Unique Management Training Facility

The hands-on environment that delivers unrivalled results

Through innovative event simulation in a controlled environment, our training programmes enable managers to develop their skills and experience under the most demanding and realistic conditions.

As an effective complement to lectures and exercises, the Management Training Facility is equipped with fully flexible communication systems, a public address system, telephones, fax, CCTV and computer links. Experienced trainers analyse the flow of information between individuals and teams from a central control facility. Sound effects and lighting can be added to heighten realism.

Ultimately, delegates develop their skills by sharing information in an open and creative manner without fear of consequences. Issues addressed include:

- Team development
- Assessment of individuals
- Leadership, command and control
- Crisis management
- Project risk reduction
- Scenario planning
- Environmental response
